

Netgenium have partnered with Hikvision offering an integrated solution that combines Netgenium's IP PoE Speaker products and Hikvision's HikCentral VMS Platform.

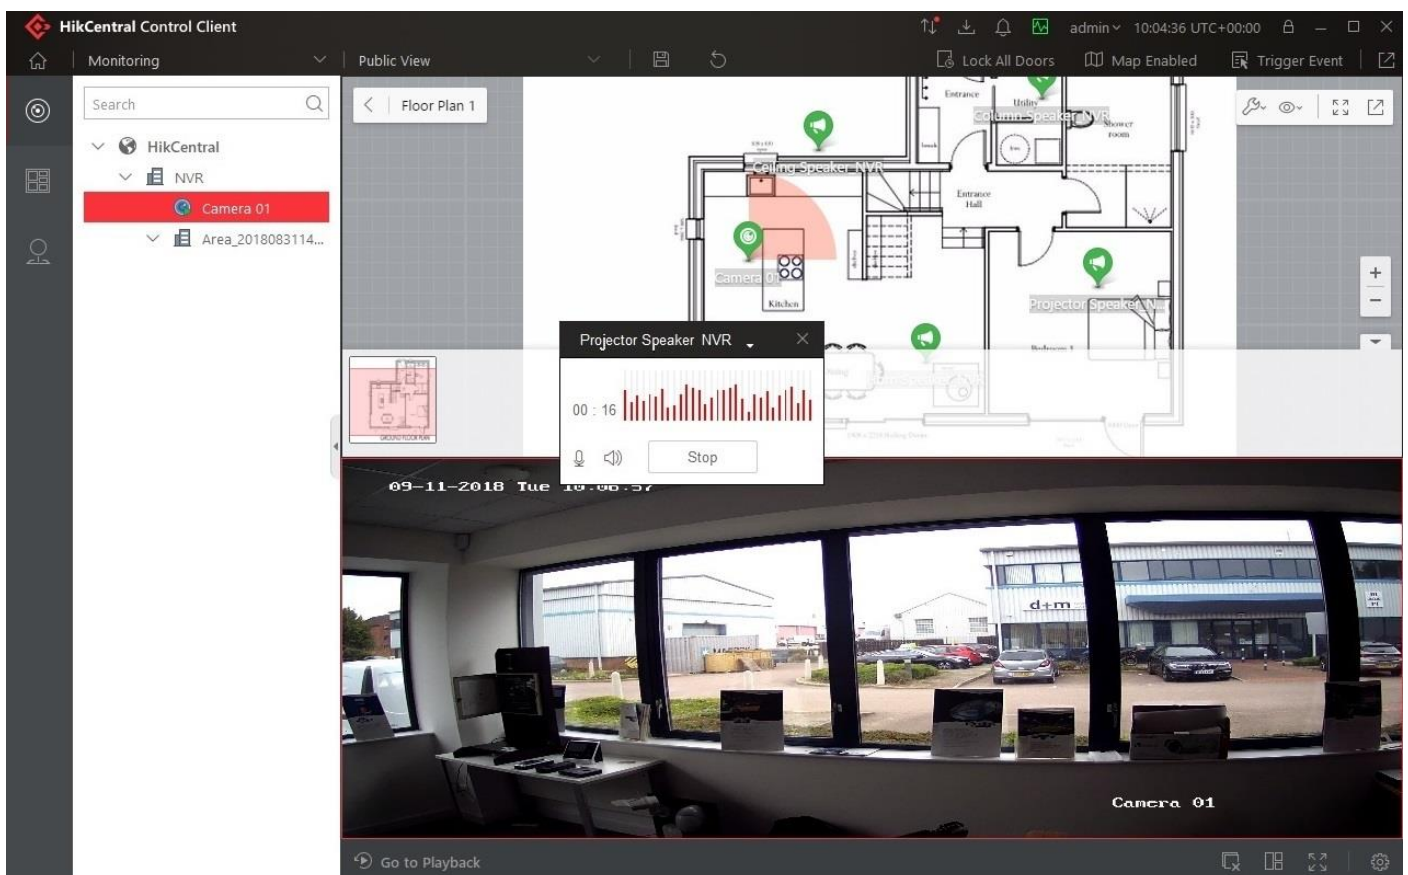

The integration gives a HikCentral user the ability to 'Talk to' or 'Listen to' Netgenium IP PoE Speakers via the HikCentral Control Client software.

This solution allows -

- Users to make announcements to speakers on the local network
- Users to make announcements to speakers on the wide area network
- Third party monitoring companies to make announcements to their customers sites

Features of the integrated solution include –

- Communication from HikCentral to IP PoE Speakers via the IP network
- IP PoE speaker selection and IP PoE speaker control is accessed via IP Camera Live View or by clicking on icons on the HikCentral Mapping Feature
- Ability to 'talk to', 'listen to' and adjust volume of IP PoE Speakers through the speaker control interface
